

Soil Health and Management to address Soil Acidification and Soil Erosion

Your invitation to learn

North East CMA is supporting growers to better understand soil health and identify the key landscape issues of soil acidification and soil erosion as part of the NECMA Soil Management Strategy

Including informative workshops and practical skills exercises, this project will undertake a range of soil analysis, and trial plots on Stanley red mountain soils and Myrtleford River Flat soils. All information collected will be available to members and guests and openly discussed

Using our **Transition to Soil Health** framework, we will equip growers with improved skills to identify and manage acidification and soil erosion in NORTH EAST VIC agricultural landscapes.

In the naturally high rainfall areas of NE Vic., soil acidification and erosion are normal interactions between soils and climate, however, often misunderstood in farming practices and the negative impact to the broader region landscapes.

Chestnut and Hazelnut Association Members **Free**

All welcome for a one off \$30 fee – inclusive of attendance to all events, and the final report
The Old Priory Beechworth, 8 Priory Lane – 14 Nov 2020

8.30am Welcome and Registration
9.00am Transition to Soil Health, Soil Analysis Results, Trial Establishment
10.15am Break
10.30am Acidity and Erosion - Theory and Practical
11.30am Conclude

Book early as number of attendees may be restricted due to COVID19 requirements

Register your expression of interest TODAY! To find out more contact us at admin@chestnutsaustralia.com.au or darren@connexusglobal.com

This project is supported by North East CMA through funding from the Australian Government's National Landcare program
